ABSTRACT

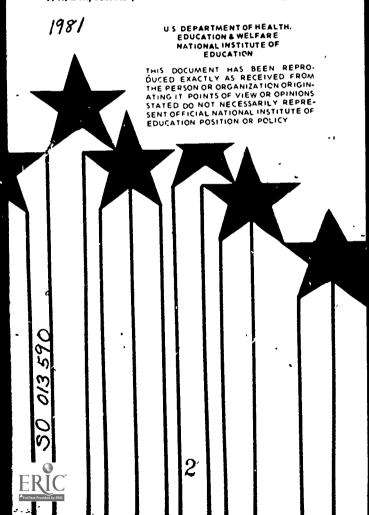

This booklet is intended as a guide to help foreign students who are studying in the United States. Opportunities for foreign students to study in the United States exist as never before; in every state, at all education levels, and in virtually every discipline and subject field. It is anticipated that the foreign student population in this country, currently numbering 286,000, will triple in the 1980s. The booklet begins with general information for the foreign student. Reference works providing information about U.S. colleges and universities and guides to financial planning and scholarship support are cited. The booklet then goes on to describe organizations and agencies which can provide students with general assistance and with assistance in particular fields of study. Also described are organizations administering foreign student exchange programs in the United States and foreign student services. The booklet concludes with a listing of U.S. embassies and other overseas posts, binational education foundations and commissions, and student counseling centers. (Author/RM)

# A Foreign Student's Guide to Study in the United States

by David Levin

U.S. DEPARTMENT OF EDUCATION T. H. Bell, Secretary

# **FOREWORD**

Opportunities for foreign students to study in the United States exist as never before, in every State, at all education levels, and in virtually every discipline and subject field. It is anticipated that the foreign student population in this country, currently numbering 286,000, will triple in the 1980's.

In an effort to assist foreign students considering study in the United States, the U.S. Department of Education's, Office of International Education Programs (OIEP) has prepared A Foreign Student's Guide to Study in the United States. This publication is designed to serve as a basic reference for students from other countries.

The Guide is part of a comprehensive effort by OIEP's Information Clearinghouse, which responds to thousands of questions annually from individuals and organizations worldwide. Such questions relate to the numerous issues in international education, including studying, teaching, working, and traveling abroad and foreign student concerns in the United States. The Clearinghouse welcomes your questions. We would also appreciate suggestions or comments you may have for future editions of this booklet.

# introduction: To the Foreign Student

This booklet provides you with helpful guidance for you to consider os you prepore for study in the United Stotes. It does not provide detoiled onswers to questions, but is designed rather to refer you to the most oppropriate sources of information in response to your needs.

The different organizations detailed in this publication can assist you in weighing the benefits of an American education, in determining what U.S. colleges and universities best meet your needs, and in securing other types of information you will need in order to study in this country. The ultimate decision to study in the United States and the choice of schools in which to enroll is, however, yours to make.

As you investigate the possibilities for study in this country, you should be awore of the major differences between the U.S. education system and those of other countries. Education in the United States is highly decentralized and is primorily the responsibility of the individual States rather than the Federal Government. Colleges and universities in this country are responsible for determining their own admissions policies and requirements and in administering their own financial oid programs. Because of this, the U.S. Government does not directly assist foreign students in securing admission to educational institutions or in obtaining financial aid from them.

Nor is the U.S. Government directly involved in the process of roting or ronking U.S. colleges or universities. This process of periodically evaluating higher education institutions to determine if they have met and continue to meet minimum standards, known in the United States as occreditation, is conducted by a variety of private local, state, regional, and notional occrediting bodies. Chapter one of

this booklet includes information sources regarding both the accreditation process and recognized accrediting organizations in the United States.

The first point of contact for many students still in their native land and contemplat. ing study in the United States is the Cultura! Affairs Officer at the nearest U.S. embassy or U.S. consular office. Other information sources include U.S. Government sponsored student counseling centers and binational foundations and commissions overseas. These various offices can provide general information about the U.S. educational system in addition to information about specific American schools, colleges, and universities. Information and guidance is also available regarding scholarship opportunities, visa requirements, employment restrictions, and other issues of concern. Chapter seven of this booklet contains a comprehensive list of these offices, by country.

### General Information

General information about the U.S. higher education system, as well as procedures for applying for admission to U.S. colleges and universities is provided in—

Entering Higher Education in the United States. 1977. \$1.00. Available from the College Board Publication Orders, Box 2815, Princeton, NJ 08540

Another useful guide, Fields of Study in U.S. Colleges and Universities: A Guide for Foreign Students, briefly describes subjects in which it is possible to earn academic degrees in this country. (See page 8.) Both publications list directories and source books of degreegranting U.S. institutions, many of which are available to the student in the library or reading room of U.S. consular office(s) abroad. (See chapter 7.)

Information about accreditation may be obtained directly from U.S. educational institutions and from the various accrediting agencies. A general description of the accreditation process is provided in—

Accreditation: Its Purposes and Uses. 1977. \$2.00. Available from the Council on Postsecondary Accreditation, One Dupont Circle, NW., Washington, DC 20036.

A list of recognized accrediting agencies ond organizations in the United States is available free of charge from—

Division of Eligibility and Agency Evaluation Office of Postsecondary Education U.S. Department of Education 400 Maryland Ave., SW. Washington, DC 20202

In regard to financial aid opportunities, most scholarship aid for students from other

countries is available directly from individual U.S. colleges and universities. Application for assistance is ordinarily made along with the application for admission. Prospective applicants for financial aid should be aware, however, that there are only a limited number of scholarships available. Moreover, the U.S. Department of Education does not administer any program that provides general scholarship support to foreign students.
